

We do good connections.

Be it business phone lines, broadband or fibre, we can find a solution that fits and possibly saves you a few quid while we're at it.

Fuss free telecoms

We specialise in straightforward broadband and fibre packages that are specially tailored for small businesses.

Unlimited

As epic as it sounds. Full unlimited business broadband with no hidden caps or charges so you can unleash the full power of your business with a service you can depend on. Woosh.

What type of tariffs can you get?

Fancy a fixed monthly plan?

We can offer a single price that you'll pay for the entirety of your contract, for example £25 a month for 12 months. However, if your contract demands that you pay per call, your bills will vary each month depending on usage. But the base price for these calls will remain the same.

How about a tiered plan?

Tiered plans can be a little more complicated as we offer a fixed price for one period then a variable price thereafter. For example, you might pay £20 a month for 12 months and then £25 a month for the following 12 months. However, the latter period of your contract might involve a percentage increase to keep in line with inflation.

*Variable plans can see price changes at any point at your provider's discretion.

What to expect in your contract:

- Business info such as name, address, and business type
- Supply details like a telephone or router number
- Contract length
- Tariff type
- Line rental costs, call costs and channel costs for your broadband or fibre
- Billing period
- T&Cs including any changes to pricing
- Notice periods and exit fees
- Your provider's contact details
